Stickybear Math 1 Deluxe

Addition and Subtraction

Optimum Resource is proud to present the new Hybrid Direct Drive Windows XP/Vista and Mac OS X native version of our award-winning program, *Stickybear Math 1 Deluxe*.

Designed to help children learn addition and subtraction.

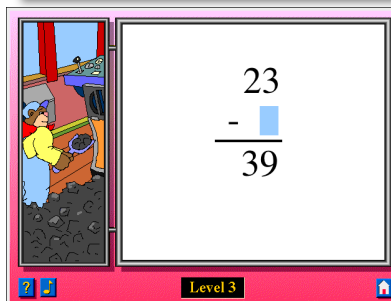

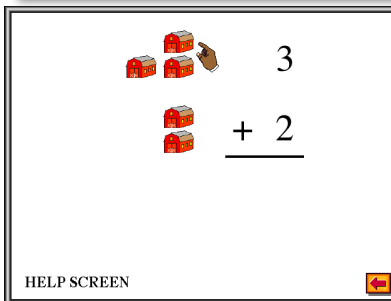

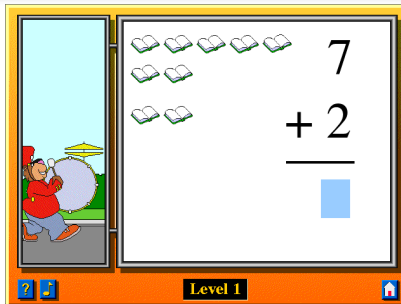

Beginning with the most elementary addition problems and continuing through more complex addition and subtraction with regrouping, *Stickybear Math 1 Deluxe* engages young students from kindergarten through grade four. The program is bilingual (English/Spanish).

Animated instructions provide an excellent skill-building tool that may be used with one child or an entire class as needed.

Children watch and listen to the process of addition and subtraction as objects and numbers are animated. As children complete each problem, small animations encourage them. When a series of correct answers is entered, lively animations appear as a reward.

New problems are continually presented keeping children busy building basic math skills.

Teachers may allow automatic advancement, present only addition, only subtraction, or both.

The program is divided into 8 levels, which include 44 individual math skills. Each level offers animated help screens with audio to teach and reinforce addition and subtraction, missing addends and subtrahends, and regrouping.

Stickybear Math 1 Deluxe may be customized for the entire class or each individual. The program allows the selection of horizontal and/or vertical presentation and specific skills: addition, subtraction, or missing addends and/or subtrahends. The progress of each student is tracked and a progress report is available for each student on screen or in printed form.

Lesson Plans and Supplemental Materials with School Versions and above.

Will run on Windows 2000, XP, Vista or PowerPC or Intel based Macs with OS X v.10.4 and above (specify DD). You may mix and match installations to either operating system. After activation the CD is no longer needed to run the program.

Suggested retail price
