# Stickybear Math 2 Deluxe

## Multiplication and Division

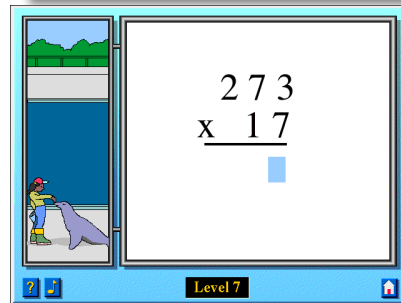

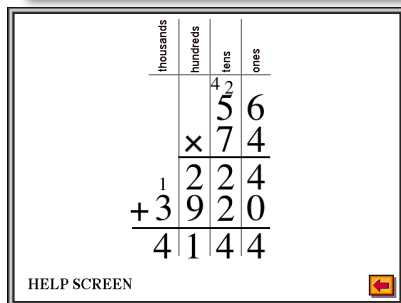

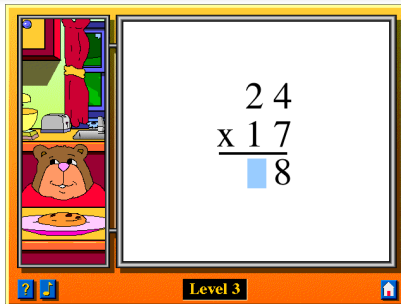

Optimum Resource is proud to present the new Hybrid Direct Drive Windows XP/Vista and Mac OS X native version of our award-winning program, *Stickybear Math 2 Deluxe*. Designed to help children learn multiplication and division.

Beginning with the most elementary multiplication problems and continuing through more complex multiplication and division with regrouping, *Stickybear Math 2 Deluxe* engages students from grades two through four. The program is bilingual (English/Spanish).

Animated instructions complete with audio explain each new concept and encourage children to investigate new skills as they advance through the 8 levels of multiplication and division covering 36 individual math skills.

On screen manipulatives are available for early understanding of the concepts of multiplication, division, missing factors and dividends.

Mastery continues as children progress through *Stickybear Math 2 Deluxe* learning multiplication and division facts and advance to multiplication of multiple digits, problems that require regrouping, and long division with remainders.

*Stickybear Math 2 Deluxe* may be customized for the entire class or each individual child including starting level, on screen manipulatives, and auto-advance. Children may begin the program at any of the 8 levels of proficiency.

Each student's progress is tracked by level, number of problems attempted, number of problems correct, and percentage correct.

*Stickybear Math 2 Deluxe* is a versatile resource for students from the second through fourth grades.

Lesson Plans and Supplemental Materials with School Versions and above.

Will run on Windows 2000, XP, Vista or PowerPC or Intel based Macs with OS X v.10.4 and above (specify DD). You may mix and match installations to either operating system. After activation the CD is no longer needed to run the program.
