# Stickybear's Reading Room

The perfect combination of learning and fun, this new Hybrid Direct Drive Windows XP/Vista and Mac OS X native version of our award-winning program, *Stickybear's Reading Room Deluxe*, provides colorful, motivating reading and thinking skills practice for children in grades K-3 (ages 4 - 8) with four unique bilingual learning activities.

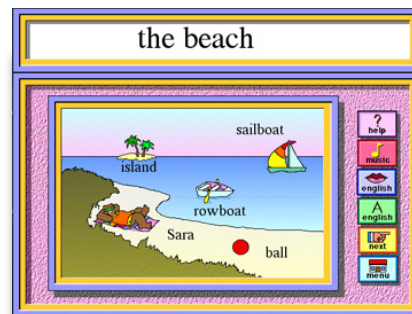

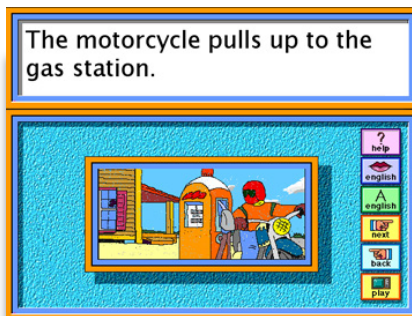

Each activity features lively animation and clear human speech in either English or Spanish. Users can toggle freely between languages.

Report cards track individual progress and children can print the sentences they create.

In *Word Bop*, children use a toy cannon to "bop" pictures into words, then back to pictures. Bop provides all the fun of an arcade game with important early learning skills including sight recognition, recognition through phonetic analysis, and literal comprehension.

Building on those skills, youngsters can begin to increase their sight vocabulary with *Word Match* where verbal reinforcement helps them match words and pictures.

*Word Book* is a picture book activity designed to enhance

sight and phonetic recognition skills as well as building and reinforcing word recognition.

*Sentence Builder*, the core activity in the suite, allows young learners to create their own animations by constructing thousands of possible sentences from noun and verb phrases. With this unique creativity and reading skills tool, children gain experience with literal and inference comprehension, predicting logical outcome, and identifying the meaning of words in context.

*Stickybear's Reading Room* has been used successfully by millions of young readers and praised by teachers and parents alike.

"Director's Choice Award"  
*Early Childhood News*

"Children's Media Award"
